Create a Prose.io Response Post.....3

Create a Prose.io Response Post

These steps will show you how to create a text file using Prose.io and saving it to the GitHub class repository.

1. Open your internet browser.
2. Log into your github.com account.
3. Login to prose.io and authenticate with github account.
4. Navigate to appropriate repository/folder.
5. Click "new file" and rename file using format: "LastName-FirstInitial-Wk#".
6. Type text in Github markdown.
7. Click "save" and "commit" to publish post to Github.
